|  | to organize, streamline and aggregate the various online LGU information resources.  |  |          |              |                              |
| Knowledge Networking Towards Enterprising Agricultural Communities | The project will adopt a proactive strategy and to bring the Internet to rural and agricultural communities in the country offers assistance to farmers, fisher folk and agribusiness owners in securing new opportunities by improving their access to a variety of online resources and knowledge generated and accumulated in the agricultural sector. It also offers a means for bridging the gaps between development professionals and rural people by initiating bottom-up articulation and sharing of local knowledge. | Dev't. Academy of the Phils. (DAP); Phil. Council for Agricultural, Forestry and Natural Resources Research Dev't. (PCARRD); Dept. of Agriculture - Phil. Rice Research Institute (DA-PhilRice); and Department of Agrarian Reform (DAR) |          | PhP191M      | Endorsed to DBM for funding. |
| Philippines' Knowledge Center on Food and Nutrition (e-Nutrition)  | The project aims to establish an automated nutrition knowledge center that will allow the electronic dissemination and utilization of nutrition survey data and results that are critical in national poverty alleviation planning and program implementation. The project shall facilitate online provision and exchange of nutrition data and data analysis, making these accessible to agencies involved in the development of national plans and to individuals requiring dietary/nutritional consultations/advise.        | Food and Nutrition Research Institute (FNRI)   |          | PhP30.51M    | Endorsement being processed. |
| PAGASA Interactive Climate and Weather                             | The project aims to establish a wider dissemination scheme by putting forward  | Philippine Atmospheric,  |          | PhP25.90M    | Endorsed to DBM for funding. |

| Project Title                | Description  | Proponent Agency/Office  | Duration | Project Cost | Remarks / Status             |
|------------------------------|--|--|----------|--------------|------------------------------|
| Information Network (PICWIN) | an interactive web-based weather-related information system. This is primarily intended for emergency managers, and is now evolving into a fully operational and supported PAGASA service, designed in close partnership with the National Disaster & Coordinating Council (NDCC) through the Office of Civil Defense (OCD), the Local Government Units (LGUs) and other public and private organizations.   | Geophysical and Astronomical Services Administration (PAGASA)    |          |              |                              |
| Knowledge Management Center  | <p>The project deemed mission-critical to further enhance the decision-making of the President from recommendations based on timely, reliable, accurate and comprehensive information.</p> <p>The project is the embodiment of a shared vision to transform OP/PMS into a role model for IT governance in the public sector. Thus, a major undertaking is the consolidation of selected knowledge/information/data relevant for effective governance by the OP and one of its primary knowledge repositories, the PMS. It is an integral part of the OP Executive Information System (OPEIS) and aligned with the NCC-approved Joint Information Systems Strategic Plan of the OP and PMS.</p> | Office of the President - Presidential Management Staff (OP-PMS) |          | PhP55.30M    | Endorsed to DBM for funding. |
